The Q3 revenues increased 81% compared to the same period last year and revenues for the nine month period ended November 30, 2020 increased 98% compared to the same period last year, continuing the growth of both the Telecommunications Products & Services (mobile recharge platform) and the SMS & MMS texting service. “With the current trajectory, the Company’s revenue growth is projected to exceed US\$19.5 million for fiscal 2021,” stated Martin Shen, CEO of FingerMotion. “The Company’s growth across its business divisions is strongly tied to the increase in prepaid deposits held in trust at the Company’s telecommunications partners.”

“The third quarter was a period of significant growth and evolution for our Company,” said Martin Shen, CEO of FingerMotion Inc. “Every quarter this fiscal year, we were able to reach new highs in revenue. This trend of ramping revenues looks like it will continue going forward, due to the strengthening of the SMS & MMS business. And our other business arms like the Big Data Insights and the Rich Communication Services (RCS) platform are evolving from the R&D phase to the beta test phase. Our Company has evolved as well, with new hires both at the corporate and operations level, which has increased our operating expenses. Most notably, we have brought on experienced actuaries, data scientists, and computer programmers to continue to advance our Insurtech division. Our endeavors for transparency have led to our upgrade to the OTCQX and we hope that shareholders have noticed our revamped website which fully presents the range of products we offer. We are excited with our sequential quarterly sales growth and expect it to continue into the future.”
